

Dropbox Filling up your hard drive? Try Selective Sync.

By unselecting the folders you don't need, those folders are deleted from your hard drive only. The files are still available via the web interface.

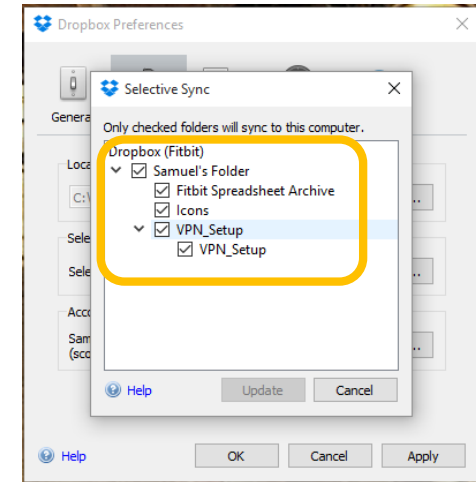

Activating Dropbox Selective Sync on a PC.

1. In the system tray, click on the Dropbox icon, click on the gear icon, then choose Preferences.

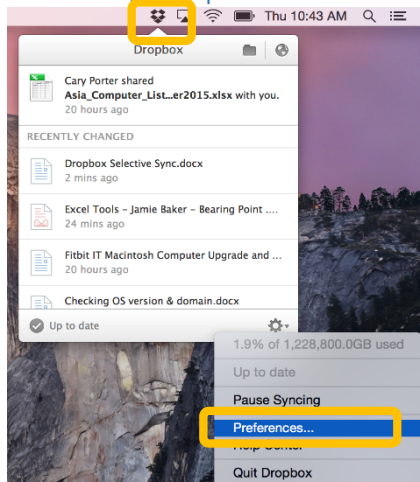

2. Click on Account, then click Selective Sync...

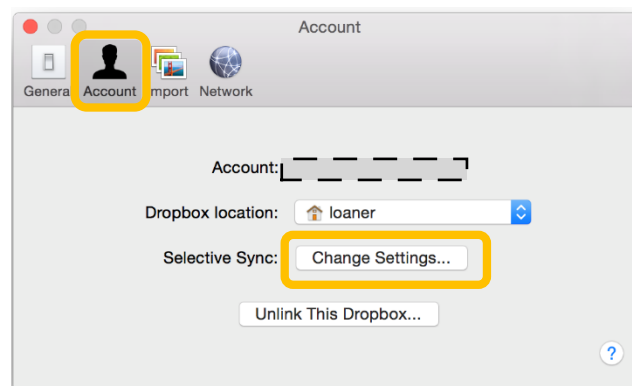

3. In the Selective Sync dialog box, uncheck the folders you do not need. Click Update.

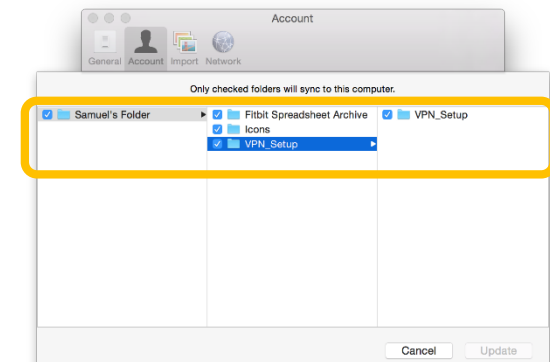

Activating Dropbox Selective Sync on a Mac

1. From the menu bar, click on the Dropbox icon, click on the gear icon, then choose Preferences.

2. Click on Account, then click on Change Settings... button next to Selective Sync.

3. In the Selective Sync dialog box, uncheck the folders you do not need. Click Update.
